

Paper Plate Narwhal

Materials:

1. One Paper Plate
2. Scissors
3. Glue Stick or tape
4. Markers, crayons, or colored pencils for decorating
5. Googly eyes (optional)

Instructions:

1. Cut the sides off of a paper plate to make the circle into what would look like a slice of pizza. Keep the sides we need them for later.

2. Take this piece and cut it in half horizontally. We are going to use these for the fins.

3. Glue the fin pieces to both the left and right side of the narwhal. Cut out a long skinny triangle from the extra piece of paper plate that is left over. This will be used for the narwhal tusk/tooth. With whatever left over pieces cut out a small heart shape for the bottom fins. This will be glued/taped on upside down with the bottom of the heart being the top.

4. Glue all of your parts together and decorate however your heart desires!!
