

### Steps to making recycled paper beaded bracelets

1. Select 9 recycled paper beads and 27 spacer beads. Sometimes having a plastic cup to put them in helps.
2. Tape down one side of the elastic cord so beads do not slide off the end.
3. Use a napkin/paper towel on the table so beads don't roll all over the place.
4. Begin stringing the beads – one big bead and 3 spacer beads in between until all beads are used.
5. Tightly knot the bracelet and use clear nail polish or crazy glue (best if buy the one with a brush) to set the knot.
6. Leave to dry and when dry cut the excess cord
